

March Newsletter 2025

New stockbay installed (see page 6)

Managing Director's Summary

I am pleased to report that we continue to make positive progress within the aggregate, recycling and utilities markets with significant new projects ranging from on-going site maintenance contracts to the design, fabrication and installation of plant to help our customers develop and improve their materials handling capabilities. Works have also included new steel-framed buildings for customers in both the agricultural and quarry sectors. Our demolition company, N&R Contractors have also been busy removing redundant concrete, asphalt and recycling plant from sites across the UK. Our success and hard work continues to reflect our commitment to growth and customer support.

Thor Atkinson, Managing Director

Exhibiting at the UK Concrete Show

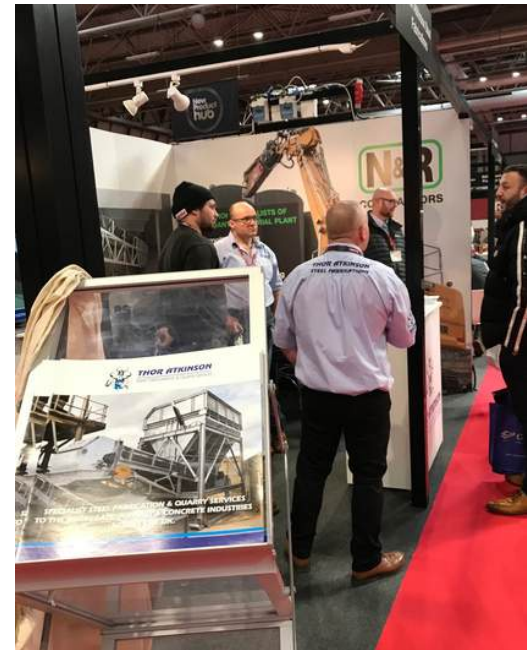

Jason Kiddle Stuart Garraway Thor Atkinson

In February, the team headed to the Birmingham NEC to promote the business at the annual UK Concrete Show.

The two day event was well attended and we had some excellent conversations with both existing customers as well as potential new ones. We felt the Show was so good for the business that we've already booked to exhibit next year!

Exhibiting at the UK Concrete Show

2025 has started well with major projects for Suez at Luton MRF and Tarmac at Mancetter Quarry, both successfully completed.

We've enjoyed a steady stream of enquiries, keeping work strong with new jobs for Breedon and Tarmac in Central Scotland, Tarmac in Shropshire, and Cemex and Tarmac in Southern England. New customer, Myers Group awarded us the demolition of their old concrete plant in Huddersfield, now replaced by a new one. Cemex also commissioned us to demolish their Fulham concrete plant, with replacement aggregate bins designed and supplied by Thor Atkinson Steel Fabrications.

We anticipate securing the demolition of an asphalt plant in Northumberland for Breedon, with Thor Atkinson quoting for the replacement plant installation. Additionally, we've been awarded the removal of an ash reprocessing plant in the Midlands for Blue Phoenix and a separate Cemex contract in the same region. These secured projects ensure a strong order book through to mid-2025.

Colin Scott, Operations Director N&R

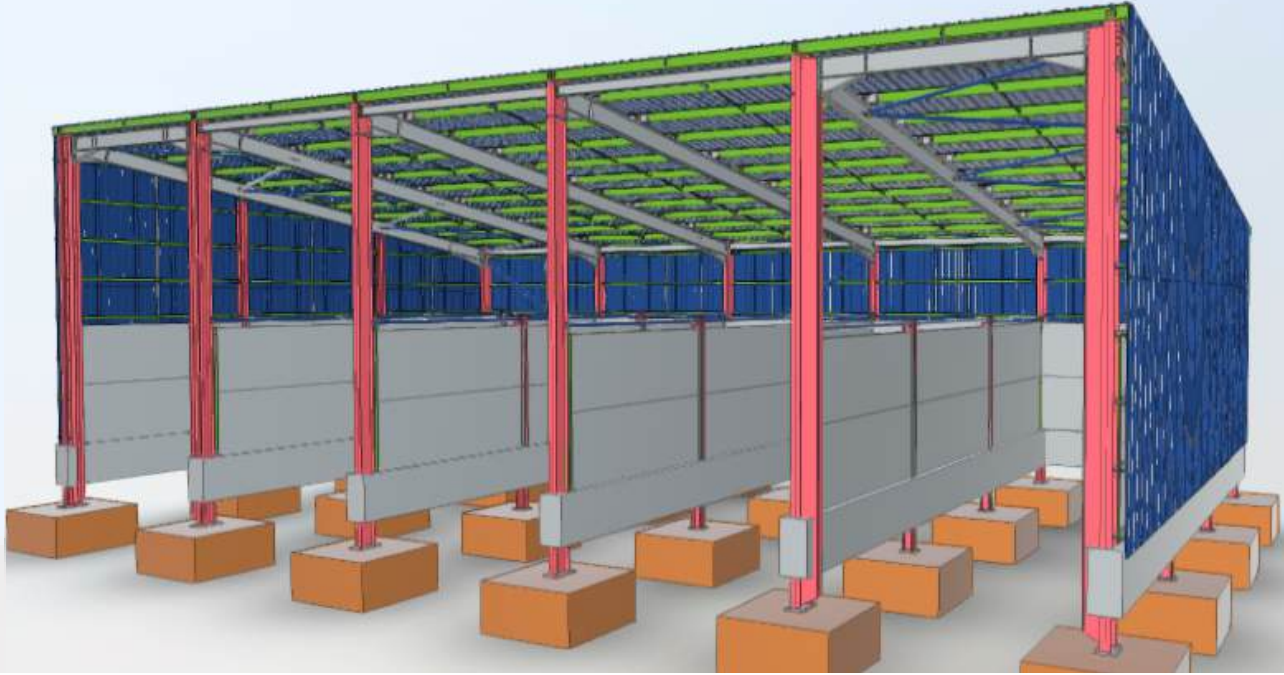

Completed demolition and clearance of entire quarry plant at Mancetter Quarry, Warwickshire

New stock bay installed

The customer required a new stock bay building so that they could increase their production. We designed, manufactured and installed the new building at our customer's site in Liverpool.

RAP System Hopper Installed

Our customer wanted us to help them to move away from the use of bucket elevators for their RAP addition. We removed the existing system and designed, fabricated and installed the new hopper and conveyor.

Pedestrian Walkway Gates

Pedestrian walkway gates manufactured in our workshops ready for delivery to customers. Safety routes combining Armco barriers and pedestrian walkway gates keep pedestrians and vehicles separate while on site.

SHEQ (Safety, Health, Environment & Quality)

Achilles

UVDB

VERIFIED

We are proud to be Achilles UVDB Verified once again after a successful audit in March, reaffirming our commitment to health, safety and compliance.

This accreditation enables us to continue working with Thames Water and other Utility Providers.

The two-day audit assessed our legal compliance and business continuity, recognising our strong leadership, effective management systems and exemplary site practices. Our task-based risk assessments were praised for their clarity and use of graphics to highlight key safety requirements.

Commended for Exceptional Health & Safety Performance:

- ✓ Zero lost time injuries
- ✓ Zero fatalities or major injuries
- ✓ Zero prohibition notices

In addition, we continue to provide comprehensive health and safety training to all employees. This achievement reinforces our dedication to maintaining a safe working environment while delivering top-quality steel fabrication services. At Thor Atkinson Steel Fabrications, safety always comes first.

Jonathan Thorne, Group SHEQ Advisor

People

We wish to welcome the following new colleagues to
Thor Atkinson Steel Fabrications:

Jade Thomson	Workshop Supervisor
Simon Hatton	Yard Operative
Dayle Davies	Groundsworker
Barrie Warner	Lead Fitter
Stewart Young	Lead Fitter
Chloe Newman	Purchasing Assistant
Paul Raynerd	Machine Operator
Steven McKenna	Fitters Mate
Daniel Pearson	Garage Assistant
Joseph Bowe	Financial Controller
Ollie Hunter	Design Engineer
Simon Clark	Lead Fitter
Harry Cassidy	Garage Assistant
Augustine Gibbs	Machine Operator
